Quiz 0 (submit to NINOVA)

Write a C-function that multiplies a given number with 10 without using the math library nor the multiplication operator *.

```
int multiply10(int x);
```

  50p if you use loops

100p if you do not use loops

Your submission is valid if you submit a valid c function file and if you submit a valid `student.c` file. Do not upload your main file.
